Tentative Diagram of CCTV Surveillance System for Jorhat Medical College & Hospital

CCTV Surveillance System Design of Jorhat Medical College and Hospital (JMCH), Jorhat, Assam

The total design of the CCTV surveillance system of JMCH campus mainly includes three modules, namely:

- The main control room design,
- The sub-control room design and

- The **Design of the Main Control Room**

The main control room design contains

- The **control system** of the **camera** and **display image** of the **surveillance points**
- The **design** of the **storage system**
- The **design** of the **sub - control room**
The JMCH planned to have two control rooms. The sub-control system computer installed with all necessary software and connected the campus network, can distribute and control the monitoring system in the sub-control points such as security office 1 and security office 2.
Main control center set the authorization management function to ensure strict monitoring system on the sub-control points.

The design of the surveillance points

Since of the cost, the fixed installation method is adopted, a color dome camera is intended to install in each spot.

- **Fixed installation is characterized by:**
The camera to monitor the distance and range will remain unchanged, not through the main control center for any control and regulation.

Equipment selection should fully guarantee to achieve monitoring without blind area, with clear image and voice.
